MEET BEAST

AI-POWERED TESTING &
APPLICATION MODERNIZATION

**Test faster.
Modernize smarter.
Reduce risk.**

BEAST (BE Agile and Swift Testing) is
Buchanan & Edwards' AI-driven automation
platform that helps organizations test
applications faster and modernize aging
systems with less risk.

By combining **automated regression testing**
with **AI-assisted code modernization**,
BEAST helps technical teams reduce repetitive
work, accelerate delivery, and keep critical
applications working as they evolve.

**ONE PLATFORM.
TWO POWERFUL
CAPABILITIES.**

ACCELERATE YOUR MISSION

SEE WHAT **BEAST** CAN DO

UNLEASH THE BEAST | TWO CAPABILITIES. ONE PLATFORM.

AUTOMATED REGRESSION TESTING

Show **BEAST** the process. **BEAST** builds the test.

BEAST captures how users perform real tasks within an application and turns those interactions into reusable automated tests.

UNDERSTAND

AUTOMATE

VERIFY

REPORT

Reduce repetitive testing, **execute** critical processes consistently, and **identify** failures faster.

AI-ASSISTED CODE MODERNIZATION

Modernize with a built-in safety net.

BEAST helps engineers refactor aging code while using automated regression testing to verify that critical functionality continues to work throughout the modernization process.

VERIFY

HUMAN REVIEW

AI **accelerates** the repetitive work.
People remain accountable for what ships.

25+ YEARS SUPPORTING THE DEPARTMENT OF STATE

Buchanan & Edwards (BE) is a prime awardee on the **EVOLVE** contract for **Functional Category 3**, supporting the Department of State with application development, testing, user experience, and system services.
